## How Tall is Your Snowman?

Can you build a snowman on the tray?

How tall is your snowman?

Is he going to stay that height all day? If not, what is going to happen to him?

Can you measure him throughout the day?

How tall do you think he is going to be after lunch?

What time of the day do you think he will have melted altogether?

Would he have melted any quicker in a different area of your room?
